FACULTY OF MANAGEMENT TECHNOLOGY

# WHAT IS IT ABOUT?

Logistics managers, as business professionals, play a vital role in corporate growth by coordinating various activities within and outside the company, fostering collaboration, and driving development.

Logistics management involves overseeing resource allocation, transportation logistics, and flow control of goods, including virtual goods like information, while emphasizing sustainability and energy efficiency. Skills required include contributing to product types and technical specifications, maintaining machine and resource utilization, managing quality control and safety requirements in packaging, transport, and shipping, all while demonstrating strong leadership and communication abilities.

# STUDY FACTS

# YOUR CAREER

Typical job titles in logistics include Logistic Manager, Warehouse Manager, Procurement Manager, Sales Manager, and Key Account Manager.

These professions involve managing resources, overseeing transportation logistics, and ensuring efficient flow control of goods. Sales and Key Account Managers coordinate with logistics teams to meet customer demands. Logistics consultants optimize processes for resource efficiency. They may be employed by online retailers, postal services, transportation hubs, factories, common carriers, and military logistics operations.
