FACULTY OF HEALTHCARE TECHNOLOGY

WHAT IS IT ABOUT?

A general nurse will be trained in the care of patients of all ages, from children to the elderly. The training is for all levels of care up to management positions in hospitals and health organizations.

In the dynamic world of nursing, the ability to swiftly identify emergencies and address medical situations with urgency is essential. Within bustling hospital wards, their adept organization ensures seamless operations and optimal patient outcomes. Their clear and compassionate

communication fosters a collaborative environment among patients, families, doctors, and administrative staff. It's this unique blend of expertise, skill, and empathy, that defines nursing excellence and ensures the highest quality of care for those in need.

YOUR CAREER

Nursing offers a diverse range of roles, from leadership positions like Head Nurse overseeing care delivery, to frontline roles such as Ward Nurse providing compassionate support.

Furthermore, there are opportunities as a Nurse across various settings, reflecting the broad landscape of healthcare. Employment options are equally varied, spanning public and private hospitals, pediatric clinics, detoxification centers, drug-rehab clinics, and rehabilitation facilities. Each setting offers unique opportunities for nurses to make a meaningful impact in patients' lives.
